

## CT Summation Enterprise

### **Anytime, Anywhere Access**

The CT Summation Enterprise product combines the functionality of CT Summation iBlaze and CT Summation WebBlaze, ensuring that your legal team has everything they need for local and secure Web-based access to case information. CT Summation Enterprise includes portable functionality, allowing you to download case information onto your laptop. By going portable, you never have to worry about not having an Internet connection—critical information is at your fingertips wherever you are.

# The strength and tools you need to tackle blockbuster cases in one integrated product.

When your case includes gigabytes of electronic information, you need a litigation tool that combines award-winning litigation support technology and time-tested solutions with the power of Microsoft® SQL Server.

### **MOBILE (PORTABLE) CAPABILITIES**

You can't always be connected to the Internet -- on planes, in opposing counsel's office, and sometimes in the courtroom. You find yourself disconnected: copy case information to your laptop and take it with you. CT Summation Enterprise ensures that you don't waste valuable time, and when you get back to the office, we make it simple to merge back your changes. CT Summation has the tools you need to take your case data on the road.

### **REALTIME**

CT Summation's realtime functionality enables you to view content during a deposition. Annotate key issues, link to evidence, and search records during testimony.

### **TAGGING AND FOLDERING**

Document coding is now lightning fast and easy to do. Quickly tag or assign a code to each document during the review process. Foldering allows you to organization documents into groups of related items for improved document organization and searching.

### **PERFORMANCE ENHANCEMENTS**

Improved performance speeds you through your case work. CopyCase to Mobile is up to 40% faster when transferring data. With WebBlaze display time for document images is reduced by up to 30%.

### **VOLUME CODING TOOLS**

Manage your large coding projects with ease. Use Review Sets to filter documents for specific reviewers. Point-and-click coding provided by CT Summation Enterprise further simplifies these projects and helps to maintain consistency throughout your records.

## COLLABORATE WITH EASE

Share secured case information over the Web with expert witnesses, co-counsel, and clients; reduce printing and shipping costs while extending the runway for tight deadlines.

## METADATA SEARCHING AND EXTRACTION

Metadata is a key factor when working with ediscovery. CT Summation Enterprise extracts and stores metadata upon load, including this critical information when searching.

## INTEGRATED SEARCHING

Search your entire case -- documents, OCR, transcripts, e-mail, notes, and pleadings -- with a single command. Advanced search allows you to pinpoint exactly the information that you want to find within a case.

## PRODUCTION TOOLS

Designed with your production workflow in mind, the CT Summation Enterprise production wizard guides you through identification of documents for production. Determine the production format, create production numbers and package the final set. You can save your work as you go, so you can easily pick up where you left off. And powerful tracking tools let you review production histories and create new sets from existing ones.

## CASE MIGRATION

The CT Summation Enterprise Migration toolkit enables you to add existing CT Summation iBlaze case data to CT Summation Enterprise.

## MINIMUM REQUIREMENTS:

*CT Summation Enterprise Server:*  
Pentium 4 - 2 GHz processor with 1 GB RAM, 200 MB plus case data hard drive, Windows 2000 or 2003 Server and SQL Server 2000 SP4 with full-text indexing.

*CT Summation WebBlaze Server:*  
Pentium III - 1 Ghz processor with 512 MB RAM, 100 MB hard drive and Windows 2000 Server with SP4 and IIS/ASP.NET.

*Mobile (Portable):*  
Pentium M 1.1GHz processor with 512 MB RAM, 40 GB 5400 RPM hard drive, SQL Server 2000 Personal Edition and Windows 2000 Professional SP4 or XP SP2.

## CT Summation Enterprise

### CT Summation Enterprise

CT Summation Enterprise combines the classic integrated transcript and document management functionality of CT Summation iBlaze including full-text imaging/PDF support, OCR-on-the-fly, electronic evidence production, tracking, and archiving, CopyCase and replication, Tagging and Foldering, Briefcasing and remote document collections.

### CT Summation WebBlaze

Our powerful Web-based product enables all members of the litigation team to access case information whenever and wherever they are.

### CT Summation

CT Summation solutions give you command over the evidence to build a strong case-- from discovery through final resolution--in one integrated, award-winning application. Our powerful search tools allow you to efficiently winnow out irrelevant information, effectively zero in on key evidence and collaboratively build a winning case. Our industry-leading in-house and hosted solutions and knowledgeable support staff are at your service during every phase of your case to help you win.
