

AD Summation Enterprise

The power and tools you need for high-volume cases

When your case consists of gigabytes of electronic information, you need the software that combines award-winning litigation support technology and time-tested solutions with the power of Microsoft® SQL Server.

DOCUMENT REVIEW

Use tagging to issue code documents with one click and maintain consistency throughout your records. Group similar documents together in Folders for improved organization, searching and streamlined workflow. Use Review Sets to filter documents for specific team members.

CULL DOCUMENTS AND CODE MORE QUICKLY

Get through your document sets faster with our built-in tools based for accelerated document review once the ESI has been processed through a near-duplicate analysis service or software.

POWERFUL SEARCHING

Our industry-leading search technology allows users to search cases with a single inquiry to instantly locate key evidence. Create concurrent compound and subset searches across all case information, including transcripts. Access work product through the Pleadings folder and make it searchable.

Create broad, simplified searches using our “Quick Search” features. Use the robust “Terms and Connectors” search operators for more complex, detailed searches. Feel secure in your searches of OCR text by drawing in potential OCR errors with our “Fuzzy Search” ability.

ORGANIZE CASE MATERIALS

Build your case from the ground up by making notes on transcripts and documents as you prepare for trial. Chronicle important dates and events in outlines or spreadsheets. Track key witnesses. Easily copy information from documents or transcripts into customized outlines.

NEAR-NATIVE EDOC VIEWER

View eDocs without the need for the native application via near native or text viewing mode. AD Summation Enterprise eliminates the need to launch an application in order to view a document, increasing the efficiency of your review workflow.

PRODUCTION TOOLS

Designed with your workflow in mind, the AD Summation Enterprise production wizard guides you through the stages of the production process, allowing you to save your work every step of the way. Advanced tracking features enable users to review the history of a production set, recall productions sets, and base new production sets off of an existing production set.

IMPORTING AND EXPORTING DATA

Flexible import formats accommodate hundreds of document and load file types. Easy export to other AD Summation systems, as well as complementary applications including Microsoft Excel. Shave valuable time off privilege log creation and organizational tasks.

PORTABILITY

Work where you need to – at the office or on the road, through a local network or offline, simply by copying your entire case to your laptop. Merge your work back into your case when you return to the office.

COMPREHENSIVE TRANSCRIPT TOOLS

Electronic transcripts eliminate the wait for your certified draft and allow you to instantly add searchable notes. Quickly and easily create summaries and witness examination outlines and compare documentary evidence to testimony. AD Summation Enterprise's powerful searching capability allows you to instantly locate key passages and link them to relevant documents, video clips, websites and case evidence. View synchronized video in tandem with the transcript, search the text to locate the corresponding video and easily create video clips of persuasive testimony.

Scanned exhibits can be directly linked to related testimony, allowing convenient one-click viewing of the transcript passage and referenced exhibit side by side. Use markup tools to emphasize important areas of exhibits. Receive transcripts with linked exhibits via email.

LIVE FEED FROM THE COURT REPORTER

Real-time instantaneous transcription allows you to easily and discreetly mark areas for review or follow up questions, minimizing distracting note-taking. Designate in advance words or phrases to be highlighted as they arise, with relevant issues automatically attached. Search across transcripts as testimony transpires.

ANYTIME, ANYWHERE ACCESS

AD Summation WebBlaze, part of the AD Summation Enterprise solution, ensures that your legal team has local and secure Web-based access to case information. Share secured case information over the Web with expert witnesses, co-counsel, and clients. Reduce printing and shipping costs and improve efficiency in meeting tight deadlines.

CASE MIGRATION

The AD Summation Enterprise Migration Toolkit enables you to add existing AD Summation iBlaze case data to AD Summation Enterprise as your cases grow.
